

Guaran Feeder's Partnership with Quantum BSO Offers best in class ERP System

Asuncion, Paraguay— 30 October 2020 — Guaran Feeder a river feeder operator in Paraguay has partnered with Quantum BSO to achieve an advanced ERP and analytics system uniquely designed for the current business model of Guaran Feeder that integrates and automates all processes across all business functions. The goal is “Zero Keystrokes”

The system being created ensures that the choice of technology and design will have an extensive shelf life. All factors that go in to the design will be whetted with industry experts from the UI and UX, the design of the Q-PORT, the choice of the technology, the database design etc.

“Quantum gave us the necessary tools to focus on the business while the system developed by them takes care of the heavy lifting, saving time and increasing our productivity in order to better serve our customers” said Guillermo Braseco, CEO of Guaran Feeder. “We are excited to go live with “Connect” and to start testing the new technology!!”

Based on Quantum's proven, easy-to-use and intuitive technologies, the *Connect* system is designed with Angular 8 and MS Entity Framework Core to provide highest levels of performance. Embedded Work-Flow engines along with best in class Robotic Process Automation allow the *Connect* to be SMART, and thereby focus on efficiency, system based transaction, and intelligence driven processing.

Furthermore, *Connect* embeds analytics at its core, and allows predictive modeling to allow both Guaran Feeder and their clients (through the E-Commerce) to access their business performance, KPI's and trends. This drives constant improvement

Connect is loaded with features that will streamline, improve and enhance the day to day activities of Guaran Feeder such as E-Booking which is an intelligent feature with embedded components that streamlines actions with minimum key strokes. Additionally it also manages bookings against allocation, assist in the approval of surplus, or re-nomination to a later vessel.

About Guaran Feeder SA- Guaran Feeder S.A., is a major River Feeder (Barge) operator and has become the top operator in the Rio de la Plato to Asuncion sector. The company was formed in 2012 and commenced operations in 2014 with a single high specification barge and purpose defined tugs, and today operates 4 such convoys.
